Cautionary Statement

Forward-looking information

This investor presentation contains forward-looking statements and information as defined in applicable securities laws including: the estimates of the Company’s mineral reserve and resources; estimates of the Company’s production volumes; forecasted sales volumes and pricing; projected revenues of the Company; exploration and development plans and objectives including a new resource statement; estimated production costs, exploration and development expenditures; estimates of ore to be mined by the Company and corresponding operating and sustaining costs; and the cost, timing and results of the commercialization of Clara. Generally, these forward-looking statements can be identified by the use of forward-looking terminology such as “expects”, “anticipates”, “believes”, “intends”, “estimates”, “potential”, “possible” and similar expressions, or statements that events, conditions or results “will”, “may”, “could” or “should” occur or achieved. Forward-looking statements are based on the assumptions, opinions and estimates of management as of the date such statements are made, and they are subject to a number of known and unknown risks and uncertainties which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievement expressed or implied by such forward-looking statements. In particular, such risks include general business and economic conditions, changes in interest and foreign currency rates, the supply and demand for, deliveries of and the level and volatility of prices of rough diamonds, costs of power and diesel, acts of foreign governments and the outcome of legal proceedings, inaccurate geological and recoverability assumptions (including with respect to the size, grade and recoverability of mineral reserves and resources), unanticipated operational difficulties (including failure of plant, equipment or processes to operate in accordance with specifications or expectations), cost escalations, unavailability of materials and equipment, government action or delays in the receipt of government approvals, industrial disturbances or other job actions, adverse weather conditions, unanticipated events relating to health safety and environmental matters, delays or failure to successfully commercialize Clara’s platform, acceptance of Clara’s platform by the diamond industry, risks relating to the technology underlying Clara’s platform and other risks inherent in the implementation of new technologies, and other risks and uncertainties described under Risks and Uncertainties disclosed under the heading “Risk Factors” in the Company’s most recent Annual Information Form available at http://www.sedar.com.

Forward-looking statements and information speak only as of the date the statements were made, and the Company does not assume any obligations to update or revise them to reflect new events or circumstances, except as required by law. Readers are cautioned not to place undue reliance on forward-looking statements and information. This presentation does not constitute an offer or invitation to purchase or subscribe for any securities and no part of it shall form the basis of or be relied upon in connection with any investment decision in relation thereto.

Technical information

The authors of these technical reports are independent of the Company and are qualified persons for the purposes of National Instrument 43-101 – Standards of Disclosure for Mineral Projects (“NI 43-101”). The technical reports are available for review on SEDAR at www.sedar.com.

All currencies mentioned in this presentation are in United States Dollars (“US$”) unless otherwise mentioned.
100% owned Karowe Mine in Botswana

- High margin diamond producer since 2012
- World renowned for its production of large Type IIa gem quality diamonds
- 170 diamonds have sold for >$1 million each and 10 single diamonds have sold for >$10 million
- Average price per carat for Karowe diamonds sold YTD $648/ct
- $49.6 million in cash on hand, no debt
- Feasibility Study underway on Karowe underground with potential to extend mine-life to 2036

100% owned Clara Diamond Solutions

- A secure, digital sales platform that uses proprietary analytics together with cloud and blockchain technologies to modernize the existing diamond supply chain, driving efficiencies, unlocking value and ensuring diamond provenance from mine to finger

Progressive Annual Dividend

- CDN$0.10 for 2018. US$257 million paid since implementation of dividend policy in 2014
Coarse size frequency distribution (SFD) that includes the regular recovery of diamonds greater than 10.8 carats in size, referred to as “specials”

Specials from Karowe are consistently high value and gem quality

South Lobe production rates of 270,000 to 290,000 carats per annum consistently achieve average diamond values of between US$625 to US$680 per carat, not including very large, rare, high quality gem diamonds like the historic 1109 carat Lesedi La Rona and the 813 carat Constellation.
Q2 2018 Highlights

100% owned Karowe Mine in Botswana

- No LTI’s / 3.8 million man hours since last LTI / LTIFR of 0.00
- Ore mined, processed and carats recovered within forecast
- 253 specials (single diamonds larger than 10.8 carats), representing 10.5% of the total recovered carats by weight and highest number of specials ever recovered by quarter
- 11 diamonds were recovered greater than 100 carats in weight, including 3 diamonds > 300 carats
- 12 diamonds sold in excess of $1 million each
- Updated resource estimate increases Indicated Mineral Resources for the South Lobe (as at end 2017) by 54% from 4.4 million carats to 6.8 million carats

100% owned Clara Diamond Solutions

- Commercialization on track for launch Q3, 2018

Q3 Dividend of C$0.025 per share to be paid on Sept. 20
Safety, Health, Environment and Community Relations

**Safety, Health & Environment**
- Continued strong focus; all leading and lagging indicators trending favourably
- LTIFR of 0.00 and 3.8 million hours since last LTI

**Community Relations Key Focus Areas**
- Collaboration between Lucara and Lundin Foundation to maximize benefits within our communities of interest in Botswana:
  - Karowe Village Initiative (KVI)
    - To be piloted in three villages: Khwee - (horticulture) & Mmadikola - Trust (Hardware store that was previously funded under KEEF)
  - Community Centre (Budget $2.6 million Total)
    - Cooperative Multipurpose indoor centre to host sporting competitions, cultural events and meetings
    - Designed for staged build starting 2019
Diamond Market

- Overall, strong continued diamond demand in Q2
- Positive outcome at the Hong Kong diamond and jewelry show in February and JCK in June 2018, slower demand going into September Hong Kong diamond and jewelry show
- Markets appear stable, manufacturers achieving better margins
- Diamond producers association (DPA) announced increase to marketing budget
- DeBeers Lightbox initiative announced with strategy to differentiate synthetic from natural diamond markets

**Polished Diamond Index**
Polished prices dropped sharply in 2017 in the holiday season but has continued to recover in 2018

**Rough Diamond Index**
A continuation of uptrend movement for Rough Index since the beginning of the year. A 9% increase since October 2017
• 253 specials recovered in Q2, highest quarterly tally Life of Mine, 10.5 wt.% (Q2-17 5.9%) of recovered carats
• 11 diamonds > 100 carats, including 3 > 300ct
• EM/PK(S) continues to contribute positively to carats recovered and % specials

(1) Non-IFRS measure
Lucara Diamond Sales YTD

**RST Sales:**
- 137,193 carats sold for proceeds of $57.4 million at an average price of $418 per carat
- 6 individual diamonds sold for more than $1 million each

**EST Sales:**
- 10 single stones totaling 1,453.06 carats; Ranging from 472.37 to 40.4 carat stones sold for proceeds of $32.48 million at an average price of $22,356 per carat
- 327.48 carat stone sold for $10.1 million or $30,900 per carat
- 4 stones sold in excess of $3 million; 10 stones sold for more than $1 million
Diamond Sales Strategy

- Historically, Lucara has held both Regular Stone Tenders (RSTs) and Exceptional Stone Tenders (ESTs)

- As of Q3 Lucara will be holding a blended tender process, whereby a greater number of exceptional stones will be sold as part of RSTs

- Production of 270,000 to 290,000 carats/yr consistently achieves diamond values of **US$625 to US$680 per carat**, not including very large, rare, high quality gems

- A blended tender process decreases the inventory time for large, high value diamonds and will generate a smoother, more predictable revenue profile, that better supports price guidance on a per sale basis

- Lucara will also be selling part of its future diamond production through Clara, its proprietary digital sales platform, following commercialization later in 2018
2018 Forecast

- Forecast sales remain in line with guidance ($170-$200m)
- Carats forecast to be sold are in line with budget (guidance 270-290k)
- Average $/carat sold is forecast at budget between $630/carat and $690/carat
- Average $/carat for Karowe diamonds sold YTD is $648/carat (1)

(1) Non-IFRS measure
Building on Positive PEA
Next Steps Toward Feasibility Study

Understanding Risk

• Incorporation of Q2/18 resource update
• Geotechnical and hydrogeological studies progressing well
• Open Pit to Underground transition
• Mine design, mining options, trade off studies in progress

Opportunities

• Financial aspects are known: revenues, diamond characteristics, size distribution, strong client base and brand recognition
• Process plant in place, modern, state of the art
• Existing operational site
• Efficiency improvements may increase potential operational throughputs
2018 Updated Mineral Resource

- 7.9 million carats hosted in 57.85 million tonnes, average grade of 13.7 cpht, average diamond value of US$ 673 per carat (NI 43-101)
- Successful reclassification to Indicated Resource of the AK06 kimberlite between 600 and 400 metres above sea level (masl) providing a new base
- Focus on prolific South Lobe of AK06
- A 54% increase in the Indicated Mineral Resource of the South Lobe from 4.42 Mct to 6.78 Mct
- Recognition that the EM/PK(S) is volumetrically the dominant unit at depth within the South Lobe
Mining: Impact of EM/PK(S)

- Gain in mining along SE quadrant of South Lobe, recovered grade circa 17-20cpht, coarse SFD (>6 wt.% up to 10 wt.%), good plant throughput, moderate yield
- Recovery of a number of high value diamonds, major contribution to Q2 revenue has been realized, ongoing contribution to Sales

Selection white goods EM/PK(S) Sample
CLARA

Lucara’s Next Generation Growth Project
A secure, digital diamond sales platform that uses proprietary analytics together with cloud and blockchain technologies to transform the sales process, matching diamond demand to supply, ensuring diamond provenance from mine to finger, driving efficiencies and unlocking value for all stakeholders.
Summary of Clara Acquisition

Clara is an affordable, potentially high value growth opportunity for Lucara that is compatible with our core diamond mining business

- All share transaction; low dilution (3.7%) and no impact to dividend
- 13.1 million shares up front
- Contingent payments of 13.4 million shares on milestones achieved
- 80/20 EBITDA sharing for ten years capped at $25 million/annum
Why?

• Current supply chain is static, inefficient, and inflexible; uses an entrenched system that hasn’t changed in over 100 years, and is ripe for disruption

• Recent technological advances make disruption possible and inevitable

• Value is being lost across the entire diamond pipeline; producers and manufacturers alike stand to benefit from a new and improved system
Prevailing Supply Chain

100 yrs old, Highly Inefficient, Unoptimized; Value Loss Throughout Supply Chain

- Producers
  - (25, 5 Principal)
- Sightholders/Primary Customers
  - (<100)
- Secondary, Tertiary Rough Traders/Manufacturers
  - (1000's)
- Integrated Manufacturers/Jewelers
  - (1000's)

Push System
How Can This be Improved?

By disrupting the existing diamond value chain, using proprietary analytics together with cloud and blockchain technologies to match diamond demand to supply, ensuring diamond provenance from mine to finger, driving efficiencies and unlocking value for all stakeholders.
Exclusive Collaboration Agreement with Sarine Diamond Technologies

Clara will be the exclusive, worldwide customer for customized interfaces and versions of Sarine's Galaxy® inclusion mapping technology and its Advisor® optimal rough planning for use with Clara's 100% owned, proprietary digital diamond sales platform.
How?

Producers
• Galaxy scan all rough diamonds as they are extracted (continuous, real time); digital files uploaded to Clara with asking prices

Manufacturers/Retailers
• Upload polished diamond orders (using Polished Diamond Parameters “PDP”s) and willing purchase price for each diamond

Clara Platform (Cloud Based)
• Plans each rough diamond
• Matches the sellers with buyers based on strength of demand from the buyer

$ $$
PDP $
Benefits

Producers

• Maximum selling price achieved for every stone
• Not reliant on tender sale cycles
• Reduces sorting inefficiencies, removes human factor
• Inventory greatly reduced, potentially eliminated
• Opportunity to establish a true “block chain” system to provide chain of custody and assurance on diamond provenance

Manufacturers/Retailers

• Purchase of rough based on polished orders
• Eliminates financial carrying costs of unwanted inventory
• Eliminates manufacturing losses taken on unwanted inventory
• Eliminates secondary market trading losses
• Opportunity to establish a true “block chain” system to provide chain of custody and assurance on diamond provenance
Benefits to Lucara

- Clara is an affordable, potentially high value, near term growth platform, compatible with the Company’s core diamond mining business
- Supports Lucara’s reputation as an industry-leader in the adoption of new technology. Non-cash transaction with no expected impact on the dividend
- Higher realized prices for Karowe rough and stable, continuous cashflow that is no longer tied to a fixed sales cycle
- Diversifies Lucara’s existing business model and creates future growth optionality; commercialization underway, on schedule for roll out Q3
- Blockchain business solution that will unlock value and ensure diamond provenance, integrity and transparency throughout the value chain

\(^1\) Non-IFRS measure
Catalysts

• Commercialization of Clara platform Q3

• Feasibility Study underway on Karowe underground with potential to extend the mine life to 2036

• Blended tender process to start Q3 - lowers inventory time for large, high value diamonds, smoother more predictable revenue profile

• Brownfields exploration continuing; Sunbird greenfields initiative launched
