The Karowe mine – commissioned Q2, 2012, commercial production July 2012 and proving to have far more to offer than originally anticipated.

9.46 carat blue diamond recovered in Oct 2012, sold for $4.51 million ($477,424/ct)

239 carat diamond recovered in March 2013, sold for $5.7 million.

299 diamonds larger than 10.8 carats recovered in first 6 months of 2013
Mining at Karowe focused on long-term sustainability
- Mining according to plan
- Opening sufficient area to provide flexibility in plant feed
- Mining in August focused on Centre and North lobes
- Mining in Q4 will primarily be from the Centre and South lobes

Karowe Mine – Status Update

- Process plant operations are mature with greater understanding of AG mill operational parameters
- Mine is currently running at design capacity
- Water resources effectively being managed through process optimization and feed material selection
- Process changes made to increase top-size of material processed following the recovery of large diamonds
- Process design for processing of hard kimberlite material being developed
Seven regular sales planned for 2013 averaging 50,000 carats per sale with one single large sale of 70 - 80,000 carat in Q3

Average sales value for H1 of $340 per carat

First Large and Exceptional Diamond sale was held in Q2, grossing over $24.5 million

Second Exceptional Diamond sale scheduled for September 2013

Sales assortments more consistent with larger sales volumes.

Careful management of sales lots required as diamond quality shifts with the recovery of diamonds from different lobes
